Mother Swartz Again. (Monrovia Planet.)

A female tramp, calling herself Mrs. Wood, and usually called "Mother Swartz," Monday last and proceeded to "do up" everybody with whom she came in contact. She had plenty of money, but didn't seem to have any of it with her, as when she made purchases at the stores she would remark in an innocent way that she had forgotten to bring her money-purse along but would return in a few moments and settle the bill. She gave one of our real estate firms to understand that she wished to purchase town lots, and was therefore given a free ride over the town, and while it is known that this firm has a large list of very choice property, Mrs. Wood was unable to find anything that suited her. She would "strike" men on the streets for two or four bits, and was usually successful. Borrowing about all the loose change in town she then proceeded to "bowl up" with a combination of whisky and medicine, which she got at the drug store under the pretense that she was suffering with an attack of fever and ague. She was a lady-like appearing woman and is no doubt an old-timer. She left Tuesday, forgetting to settle her board and back bill.

A Loud Call on Tom Ochiltree. (El Paso Times.)

"One by one the roses fall." Manning, our new Minister to Mexico has gone the way of Sedgewick. He commenced his official career just like Sedgewick, with a big spree at the Jockey Club, and the subsequent four days' delirium. It is high time that the sort of thing should stop. The Times has once before suggested that Tom Ochiltree should be sent as our Minister to Mexico. That would obviate all further scandal. Tom could drink the whole city dry, Jockey Club and all, togas, mescol, pugue, and what not, and never show the least sign of it. Never ruffle a feather. True, Tom is not exactly in political accord with the present administration, but he conveys with his usual verifiability soon rectify that little difficulty. The honor of the country is at stake, Tom. Turn Democrat at once, Tom, or turn Mugwump and take the Mexican mission.

## DOMESTIC TOPICS.

### The Moon Claimant Confident of Success.

Conflicting Evidence as to the Genuineness of His Story.

Gen. Hazen's Scheme to Promote the Efficacy of the Signal Service.

A Fatal Powder Explosion in Pittsburgh—Serious Illness of Mrs. Judge Davis—Hurricane and Loss of Life.

By Telegram to The Times.

PROVIDENCE (R. I.), Dec. 2.—"Doc" Levi Wilson was seen at the office of his counsel, George J. West, this morning. He says that now that the secret was out he felt better than he had since he was 17 years of age. "If," said he, "the Wilson's (meaning the people with whom he had lived during his boyhood days) stand by me now, I shall win my case and triumph over Moon. Moon knows that I am his son. He is an admitted perjurer." He said he would continue his case in the courts to a conclusion, which he felt confident would be in his favor. The secret of the case remains as much of a mystery as ever. Dates and all evidence collected to date contradicts the sensational story telegraphed from Providence last night.

SHE DENIES HIS STORY.

The Journal reporter interviewed Mrs. Young, a sister of Levi Wilson, at Putnam, Conn., this afternoon. She stated that Levi was a son of John Wilson, and that her aunt was present at the time of his birth. He was named after her first husband, whose name was Levi Fessenden, and her father and mother knew nothing about Moon for years after that.

WASHINGTON, Dec. 2.—The records of the town of Oxford, Mass., show that Levi Wilson was born there on December 1, 1853, 11 months after Mrs. Moon died.

To Promote the Signal Service.

WASHINGTON, Dec. 2.—Gen. Hazen, Chief Signal Officer, has submitted to the Secretary of War, with a request for approval and recommendation, a bill providing for the reorganization of the Signal Service and its incorporation as a regular bureau of the War Department, having charge of weather predicting, army signaling, and maintenance and repair of army telegraph lines.

A Fatal Powder Explosion.

PITTSBURGH, Dec. 2.—The Commercial-Gazette's Bellefonte (Ohio) special says: "There was a terrible explosion of powder in the store of Robert Hall, six miles west of here this afternoon, fatally injuring three persons, and seriously bruising and burning four others. The explosion was caused by some one sleeping on a powder barrel that was lying on the floor, when a spark ignited the powder in a keg and blew the whole end out of the store."

A Hopeless Invalid.

NEW YORK, Dec. 2.—A Washington special says that Mrs. John Davis, second daughter of the late Secretary Frelinghuysen, and wife of Judge Davis, of the Court of Claims, has become a hopeless invalid. She has never recovered from injuries received by being thrown from a buggy at Lenox, Mass., last summer.

Loss of Life at Sea.

NEW YORK, Dec. 2.—The steamer Western Land, from Antwerp, which arrived here to-day, reports that on November 27th, in latitude 45 deg. 30 min., longitude 43 deg. 37 min., she encountered a terrific hurricane from north-west, during which, at 3:45 p.m., an immense sea struck the vessel, killing four seamen and two passengers and causing the severely injuring fifteen others, seamen and passengers.

SHOULD HAVE INQUIRED.

A Bank Molested for an Unbusinesslike Transaction.

SAN FRANCISCO, Dec. 2.—[By the Western Associated Press.] Judge Maguire rendered a judgment in favor of the plaintiff to-day, in the case of J. H. Byers vs. The Nevada Bank. This was an action for damages for alleged conversion of 3748 sacks of wheat, valued at \$6150. The evidence showed that in October, 1884, Byers shipped to his agent W. Matthews, the above-said number of sacks of wheat. Matthews, without consulting Byers, negotiated with the Nevada Bank a loan of \$4000 on the wheat. The judge said in rendering his decision, that Matthews led the bank to believe he was sole owner of the wheat. The judge continued: "Whatever may have been the character in which Matthews pretended to act, or in which the bank believed him to be acting, he had no authority, expressed or implied, to represent Byers, and his acts were never ratified by Byers. Byers is, therefore, entitled to recover from the bank the full value of the wheat converted."

Seeking a Compromise.

RICHMOND, Dec. 2.—A rumor of the failure of Cardozo & Co., retail dry goods merchants, was in circulation last night. Investigation proves that E. H. Lyons, junior member of the firm, is in New York negotiating for a 50 per cent. compromise with the creditors. No deed of assignment has been filed here, and Cardozo says none will be. The assets of the concern are \$62,000; liabilities, \$60,000.

To Test Its Strength.

HARTFORD (Conn.), Dec. 2.—Eight prisoners of second-class hotels and restaurants in this city were arrested yesterday for using oleomargarine on their tables without displaying the placard "oleomargarine butter," as required by law, under penalty of \$50 fine. The cases were continued for one week, under \$200 bonds each. These may be regarded as test cases.

Singular Case of Poisoning.

SANTA CRUZ, Dec. 2.—Last evening Police Officer Major's 7-year-old daughter died from the effects of a dose of poison which she accidentally swallowed. It is not known what manner the poison was obtained by the child. She retired at 8 o'clock in the evening, and two hours afterward awoke her mother by loud screaming. A physician was summoned, and the child died just as he reached the house.

## A QUESTION OF VERACITY.

Chairman Jones's Reply to Ex-Secretary Chandler.

PITTSBURGH, Dec. 2.—[By the Western Associated Press.] In his recent letter to the Boston Herald, ex-Secretary Chandler said: "After the Presidential election the chairman of the National Committee was indiscreet enough, in a published interview, to impute to President Arthur and members of his Cabinet a want of fidelity and zeal in the canvass. This charge was baseless and was so declared by me at the time. All possible and appropriate assistance was rendered. Should not have been expected that we should supersede the chairman or do his work, although it would have been better if some one had done so."

A reporter of the Pittsburgh Commercial-Gazette called upon B. F. Jones, chairman of the National Committee, and asked him what he had to say in reply to this paragraph. Jones said: "The statements made by me in an interview with Chandler I then considered necessary and proper to make, and now, as then, know them to be true. The purpose of those statements was that if Arthur and his Cabinet, with few exceptions, had been as loyal to Blaine as Blaine would have been to Arthur, had the latter been as loyal to Wilson as Wilson has been to President. So far as Chandler's reference to me personally is concerned, I do not feel called upon to defend myself. I have no taste for, nor do I see any present reason for discussion with one whose plans and proposals during the brief intercourse I had with him in the campaign of 1884 were not such as to commend him to those having the success of the Republican party at heart. His criticism, at that time, of men then most prominent in the party, do not seem to me quite consistent with his present expressions of regret in regard to feeling between public and private life. I do not like to feel called upon to make public the facts upon which my opinion of Chandler is based."

## AN EXTRADITION TREATY.

Principal Features of the New Document.

WASHINGTON, Dec. 2.—[By the Western Associated Press.] The President has issued a proclamation promulgating the extradition treaty with Japan, ratified last June. The treaty provides for the extradition of persons accused of the following crimes: Murder, assault to murder, counterfeiting, uttering counterfeit, forgery, burglary, breaking into buildings with intent to commit felony, perjury, subornation of perjury, murder, assault with intent to kill, and manslaughter on the high seas on board of a ship bearing the flag of the country, malicious destruction of property or attempt to destroy railway trains, vessels, bridges, dwellings, public edifices, and other buildings when it injures human life. If any person demanded be held for trial in the country on which the demand is made, it shall be optional with the latter to grant the extradition or proceed with the trial, provided that unless the trial be for crimes for which the fugitive is demanded, a delay shall not prevent ultimate extradition. If it be made to appear that extradition is sought with a view to the trial or punishment of a political offender, the fugitive shall not take place, nor shall any person surrendered be tried or punished for political offenses committed prior to his extradition, or for any offense other than that in respect of which extradition is demanded. No political indignation will make the success of the treaty any more rapid."

## DECLARE THEIR PRINCIPLES.

A Circular from the United Labor Organizations.

PITTSBURGH, Dec. 2.—[By the Western Associated Press.] A circular has been issued by the National Committee of the United Labor organizations containing a declaration of their principles and the objects of the industrial movements. The convention is to be held at Cincinnati, February 22, 1887. The circular sets forth that the representatives renounce other political traditions, and that the only labor may be emancipated and the government restored to the people. The plan of organization contemplates the appointing of organizers for each State and Territory, each State organizer to appoint a district organizer for each Congressional district in his State, and the district organizer to appoint local organizers. The basis of representation gives each Congressional district one representative, and each local organization in such district, as the Knights of Labor, trades-unions, Greenback and Labor parties, etc.

## THE RIDDLE WILL BE.

Determined Effort to Break the Document.

SAN LUIS OBISPO, Dec. 2.—[By the Western Associated Press.] The time of the Superior Court was to-day occupied in listening to the reading of land patents and deeds having bearing on the Biddle estate. The plaintiff intends to show the amount of property owned by Biddle at the period of making the will; also, that he was laboring under a delusion as to his possessions at the time, and that he did not, as he affirms in the will, distribute the property equitably between his heirs. It is believed that the documents introduced, and some expert testimony to be taken, will show the estate to have been worth nearly \$300,000 at the time the will was made, in 1874. This would make the present estate worth about \$600,000, at the rate property values have increased.

## To Abate a Nuisance.

AYER (Mass.), Dec. 2.—A large two-story brick building and contents, owned by Baeder & Co., glue manufacturers, were burned this morning. The fire is supposed to be incendiary, because threats have been made against the company on account of the bad odor always arising from the works. Loss, \$150,000.

## His Merit Appreciated.

WASHINGTON, Dec. 2.—The Secretary of War has approved the request made by the Chief Signal Officer that Lieut. Greely be retained on duty in the Signal Office as assistant to Gen. Hazen, who is in ill-health.

## No Truth in It.

LONDON, Dec. 2.—A dispatch from Paris, received this evening, states that the Minister of Marine says the report of the loss of the transport Chanderanagor is unfounded.

## An Editor's Responsibility.

SALT LAKE, Dec. 2.—B. H. Roberts, editor of the Salt Lake Herald, was arrested this morning on a charge of unlawful cohabitation. He gave \$5000 bail till his examination to-morrow.

## FOREIGN AFFAIRS.

### Opinion of Ireland's Home Secretary.

He Declares Legal the Plans of the National League.

Loss of Thirty Lives by a Colliery Explosion.

Emperor William Dines no Demonstration—Belgians Still Without a Reasonable Amiability.

By Telegram to The Times.

DUBLIN, Dec. 2.—[By Cable.] The United Ireland publishes a legal opinion given by the Right Hon. Hugh Holmes, attorney general for Ireland, to the government, as to its right to suppress the new movement of the Irish National League, which is aimed to best the landlords by having tenants deposit with a trustee such sums below the demanded rents, as they believe fair and are willing to pay. The action which the landlords proposed to have the government adopt to crush out this form of resistance, was to arrest every person who should act as trustee, rendering the League's plan of paying rent futile, a landlord's agent being, of course, debarred from accepting tenders below the landlord's figures. The Attorney-General says that men have a legal right to act as trustees, as proposed by the League, and the government has no right to arrest them for so acting. Mr. Holmes advises the landlord to seek some method of getting their money which will not involve government assistance.

## TO PROTECT TENANTS.

DUBLIN, Dec. 2.—To frustrate the landlords' endeavors to seize rents by means of garnishee orders served on a tenant's trustee, instructions have been issued, advising trustees to convey all moneys to persons of assured integrity, but possessed of no property which the garnishee orders will not affect. This precaution has already been taken in regard to twenty-seven properties.

## CORRECTION WILL NOT SUCCEED.

LONDON, Dec. 2.—A dispatch from Dublin gives an account of an interview had there with Mr. Sexton. When asked whether he thought the League would be suppressed, Mr. Sexton answered: "No. If the government attempts to suppress the League through its Viceroys, it will find itself in a ruinously precarious position. Moreover, if the League be suppressed, its meetings and its meetings will find the situation more difficult than ever, as public indignation will make the success of the tenants all the more rapid."

## Severe Loss by a Colliery Explosion.

LONDON, Dec. 2.—Thirty men were instantly killed by an explosion in Lemore Colliery, in Durham, to-day. The ancient church of St. Mary Magdalen, in Knight Rider street, was partially destroyed, and four warehouses in the same street were a total loss. The damage amounts to \$500,000.

## Desires Quietude.

BERLIN, Dec. 2.—On the occasion of the nineteenth anniversary of the Emperor's birth there will be no public demonstration, as it is understood that the Emperor is desirous that the day be passed quietly.

## Still Seeking a Sovereign.

SOVIA, Dec. 2.—A deputation of Bulgarian nobles, instructed by the government to visit different powers and personally place before them the facts of the Bulgarian situation, has started on its tour. It is reported that the deputation has been instructed to demand that the powers shall either consent to have Prince Waldemar, of Denmark, elected King of Bulgaria, or else permit the return of Prince Alexander.

## He Yields a Point.

MADRID, Dec. 2.—Spain, after a long and difficult diplomatic controversy, has finally succeeded in inducing Bismarck to abandon his proposal to establish a naval station at Caroline islands.

## He Seems to Enjoy It.

LONDON, Dec. 2.—The Campbell trial will last four days more. The Duke of Marlborough has been present throughout, accompanied by a secretary, who takes copious notes. The Duke laughs at the various points, more with the air of an amused spectator than one personally interested. Capt. Shaw was present to-day while O'Neill was giving his evidence as to how, looking through a keyhole, he saw Shaw and Lady Campbell in a compromising position. O'Neill's statement was full and clear, and impressed the court, and Russell's cross-examination failed to shake his testimony. Some society papers lament the effect of the evidence on the reputation of the aristocrats among the people.

## Not a Success.

PARIS, Dec. 2.—Dr. Collin, of Paris, read a paper before the Academy of Science to-day, showing that the annual average number of deaths from rabies in France is 36, and that since M. Pasteur began his course of treatment the same number of patients have died. According to official statistics the number of persons bitten by mad animals last year in France was 351, while M. Pasteur has treated 117 patients. Dr. Collin concludes that the Pasteur system is of doubtful efficacy, and is alarmed for the results of virulent inoculation.

## A Great Coal Deposit.

OTTAWA (Ont.), Dec. 2.—A member of the Geological Survey sent on investigating the coal deposit in the Saskatchewan region states that the coal supply in the Northwest is absolutely inexhaustible. The whole district lying between the Rocky Mountain House and Fort Pitt is one vast series of coal-beds, both hard and soft, of the best quality.

## Died from Inanition.

BUCHAREST, Dec. 2.—The new plot furnished here on November 20th, by Russian refugees from Bulgaria, headed by Stankoff, and having for its avowed object the overthrow of the Bulgarian regency and the fomenting of a revolution, has proved abortive. The Bulgarian government has furnished no money for the enterprise.

## A BAD BREAK.

## DECLINE IN MINING STOCKS YESTERDAY.

The Bulls and Bears Again Contest for Supremacy—Failure of Prominent Stock Firms—Collapse of a Virginia City Firm.

By Telegraph to The Times.

SAN FRANCISCO, Dec. 2.—[By the Western Associated Press.] When the mining board opened this morning Ophir reached \$31.50; Savage rose to \$20.50, but dropped at the close to \$19; Best & Belcher opened at \$27 and declined to \$25.75; Consolidated California and Virginia opened at \$32, but declined under heavy sales to \$48. There was a general weakening all along the line. After the first session the failure of R. C. Hooker, a leading broker, was announced, and a bad break began in the market. To make matters worse, rumors affecting the credit of other brokerage firms and that of a leading operator, were rife. California plunged down to \$42.50; Best & Belcher to \$19.50; Ophir to \$20.75, and others were lower. At the close a firm feeling set in. Owing to the reported failure of the consolidation the San Francisco Board resolved not to hold any session at 11:30 a. m., but to have their next session at 1:30 p. m., as it was not possible to allow brokers to overhaul their books and see how they stood with each other, and it might prevent a serious panic.

NO IMPROVEMENT IN THE AFTERNOON.

The 3 o'clock session was looked forward to with deep anxiety by the bulls and with considerable interest by the bears. The fact that several brokerage firms, one or two of them of considerable importance, were on the ragged edge because of being short of the market, and that others had failed for the same reason and were making desperate efforts to alleviate their disaster as much as possible, caused a very general belief that a concentrated effort would be made to break the market, especially as prices had suffered up between 10 and 15 points. The session opened the caller announced the suspension of J. Greenbaum, and a heavy rally was made by the bulls. Notwithstanding heavy buying by the bulls, the prices of the more prominent stocks went down with a plunge. Alpha dropped from \$8 to \$7.75; Belcher from \$27.50 to \$25; Best & Belcher broke to \$19, but closed at \$23; Consolidated California and Virginia closed at \$41. Confidence dropped from \$15, the closing price at first session, to \$35. At the close of the market Crown Point dropped from \$5.50 to \$4.75; Gould & Curry from \$13.50 to \$12.75; Ophir from \$30.50 to \$28; Potomac from \$10.00 to \$9.75; Savage \$15.15 to \$13.75; Utah \$9 to \$8; Yellow Jacket \$11 to \$10.50.

A REVIEW OF THE DAY.

The excitement which prevailed today in mining shares has not been equaled since 1878. Old stock speculators, who thought that the glory of the Golden State had departed with the New Constitution, braced up and looked on with amazement at the crowds that besieged the brokers' offices. The fact that Consolidated Virginia had reached nearly \$50 seemed only to whet their appetites to get more, when more prudent ones told them that the tide was about to turn they only laughed in their faces and said: "We will see." When the morning board opened Ophir was sent to \$31.50, the highest price reached. Sierra Nevada sold for an even \$100. Gould & Curry, not to be deterred, went to \$13.75, and then Consolidated Virginia, which closed last night at \$49.50, opened at \$52. At this moment the market boomed, and fortunes were to be had for the asking of them. The session, however, had hardly closed when news arrived from Virginia that the market had gone up for a million. This was a staggerer, and the weak ones hauled off. Hardly had they recovered from the shock when the announcement was made that R. C. Hooker, one of the staunchest brokers of Fine street and son-in-law of ex-Senator Stewart, of Nevada, had pulled down his blinds, with liabilities running up into the hundreds of thousands. Had this latter announcement been quickly followed by another of an equally grave character, the result would have been a general stampede all along the line, bringing ruin to many. Fortunately none took place, and the few who were playing for their "all" were given a few minutes' breathing time before the worst overtook them.

THE CHASE.

When the second session opened Consolidated Virginia dropped to 42. The news was quickly communicated to the street, and for a second time during the day a serious panic seemed imminent. The agency was rendered still more acute when the announcement went forth that Greenbaum & Straus had suspended for nearly a million. They were correspondents of the Franklins, of Virginia, whose failure had been announced in the morning. When, on top of all this, it was published that two other prominent speculators, L. F. Morrow and Maurice Schmidt had gone to the wall, it was generally believed that the best time of the end had come. And things were by no means improved when it was learned that Consolidated Virginia, after rallying a point, had closed at \$40, the lowest figure touched during the day. The statements that Morrow and Schmidt are embarrassed are positively untrue, and as far as the learned, the liabilities of each have been promptly met.

A GRIEVOUS FAILURE IN VIRGINIA CITY.

YONKONA CITY (Nev.), Dec. 2.—B. Frankel & Co., the oldest stock broker firm in Story county, filed a petition in insolvency this morning. The liabilities foot up \$915,000. The assets are nominal. The list of creditors includes the United States, the Bank of California, the Bank of Nevada, and operators on the coast. Following are the names of the heaviest sufferers through the suspension: S. L. Jones, superintendent of the Crown Point and Belcher, \$300,000; Gen. Keating, superintendent of the Savage and Hale & Norcross, \$50,000; Col. E. D. Boyle, superintendent of the Alta, \$30,000. The list includes the names of scores of miners and clerks, with a liberal sprinkling of young ladies and men from L. B. Frankel, the senior partner in the firm, retired from active business several years ago. He is reported to be a millionaire, and as his name still appears on the sign over the office, the creditors have a faint hope of recovering at least a portion of their losses. Three younger brothers—Sol, Louis and Jacob—departed this morning on foot. Great excitement prevails in the community at the failure, and if the members of the firm had not skipped out, unpleasant consequences might have resulted. The brothers are supposed to have secured ample fortune by holding nearly every cent in coin deposited with them since the rise in shares began. Their business was enormous, the receipts in a single day sometimes feeding up to \$60,000, deposited for the purchase of mining shares.

A Gentle Reminder.

CHARLESTON (S. C.), Dec. 2.—There were slight shocks of earthquake at Summerville last night and this morning. There was a severe shock at Columbia at 2 o'clock this morning, and two slight disturbances in Charleston, one about 1 o'clock and the other at 3. No damage is reported in any quarter.

Massacre by Pirates.

PARIS, Dec. 2.—Advises from Havre, the capital of Toucoules that the pirates at Hankal have massacred two interpreters and twelve soldiers.

## SAN DIEGO'S HARBOR.

## Its Advantages Defined by Executive Officer Stevenson.

WASHINGTON, Dec. 2.—[By the Western Associated Press.] Mr. James Stevenson, executive officer of the United States Geological Survey, has just returned to Washington from Southern California, where he has been for several weeks, making some preliminary investigations regarding the character and resources of that portion of the State. The principal feature of his instructions was to ascertain the character of the climate, and also to ascertain whether geological and topographical parties could work in Southern California during the entire year, also whether geological, topographical and other scientific researches were sufficiently important to warrant the establishment of such in the southern part of the State. The substance of Mr. Stevenson's report will be to urge the commencement of such work at once. He considers that portion of the Pacific coast one of the most interesting and prosperous he has ever visited. He says that the recent introduction of the Atlantic and Pacific and the Alchison, Topeka and Santa Fe roads into San Diego has had a most marvelous influence. Thousands of people are now flocking to the coast, and the developments that have followed are unparalleled. The port of San Diego, in which a few years ago there were but a few small boats, is now visited by vessels from all parts of the world, especially Australia, China, Japan, Oregon and Alaska. Australian ships, laden with cargoes of coal, sugar, tea, silk and Japan with silks and other products peculiar to those countries, while those from Alaska bring lumber from the great forests of that region. Mr. Stevenson says that the port of San Diego, through the Colorado Canal, is being prepared to receive the business of all the great ship transportation lines for shipment on the trans-continental railways—Alchison, Topeka and Santa Fe and the Atlantic and Pacific. Within a short time the Geological Survey will have experts at work in the field, endeavoring to ascertain the topography and making maps for the information of the world.

## AN INDIGNANT JUDGE.

He Denounces the Aspersions of a New York Detective.

SAN FRANCISCO, Dec. 2.—[By the Western Associated Press.] Jimmy Hope, the famous burglar, was before Judge Toohy today, on a writ of habeas corpus. Before the proceedings began the court called attention to remarks of Inspector Byrne, of the New York detective force, contained in a recent dispatch, saying, among other things in relation to the Hope case, that the gamblers here had elected certain officials who could be of use when needed. Judge Toohy said he considered this assertion a reflection on the Supreme Court of this State. When the judge thought his duty, he denounced the assertion to be as false as it is infamous. How it happened to be made at this time he could not say. He said that it was inspired by any one here. After the judge's remarks argument began, and continued until the adjournment of the court.

## Refuse the Compromise.

SAN FRANCISCO, Dec. 2.—An injunction has been issued by the Superior Court, enjoining Rosenbaum & Shelline, who are acting as agents of Baldwin Gardner, the absconding stock-broker, from paying any further sums in settlement of claims against him. When the injunction was issued, nearly \$20,000 had been paid out to creditors on the 37 1/2 cents on the dollar agreement. The injunction was the result of a petition, filed by the creditors of the absconding stock-broker, who declared the position vacant, Louis Marshall, formerly vice-president, has been elected to the vacant office.

## Betrayed His Trust.

CHICAGO, Dec. 2.—The Inter-Ocean says: "Miser T. Ames, the millionaire coal merchant, is a victim of Theodore S. Mize, his confidential bookkeeper, who has been in his employ for 14 years, and who has perpetrated a robbery which is estimated at \$100,000 and may exceed that. About a week ago Ames discovered something wrong with the money account, and it is said he taxed Mize with the dishonesty. Mize confessed his guilt. Since then all his property which could be found, including five houses, has been turned over to Ames."

## Better Late Than Never.

SAN FRANCISCO, Dec. 2.—The money collected in the city for the relief of the Charleston sufferers, amounting to \$11,547, has been forwarded to Mayor Courtney, of Charleston. This amount does not include \$7000, which was sent to the city of Charleston by the Grand Opera House for the sufferers.

## Sentence Commuted.

SAN JOSE, Dec. 2.—A message was received this morning by the attorneys for Jung Kung Sing, convicted of the murder of Henry Vandervort, and sentenced to be hanged to-morrow, that the sentence had been commuted to imprisonment for life.

## A Great Work Ended.

WASHINGTON, Dec. 2.—President's message is practically complete, and the clerical force at the White House is now engaged in preparing copies for both houses of Congress.

## THE LONDON SCANDAL.

## Synopsis of the Testimony YESTERDAY.

Two of Lord Collin's Servants Testify to Misconduct on the Part of Plaintiff, and the End Not Yet-Interesting Details.

By Telegraph to The Times.

LONDON, Dec. 2.—[By Cable.] In the Campbell divorce case to-day the defense first called Dr. Laroche, who was Lord Campbell's indoor servant in 1882. He testified that he used to announce visitors to Lady Campbell when she was in his lordship's apartment. Lady Collin had told witness once on no account to announce the arrival of Chief Shaw or the Duke of Marlborough in the hearing of Lord Campbell. After this instruction the witness made excuses when he used to announce the arrival of either Chief Shaw or the Duke of Marlborough, and he was saying that the cook wanted to see her ladyship. Witness had shown the Duke of Marlborough into the drawing-room seven or eight times. Once witness saw the Duke sitting beside Lady Collin on a settee with his arm behind her, but witness could not say whether or not on her waist. Lady Collin asked witness if he saw witness, and she was flushed. The Duke asked excitedly. Witness once saw Chief Shaw and Lady Collin sitting on a settee, but Chief Shaw had his arm behind Lady Collin.

O'Neill, who was a man servant in the household of Lord Campbell in 1882, testified that once, when carrying a message to the drawing-room, he found the door locked and went away. Returning in a few minutes he found the door open and saw Marlborough and Lady Collin sitting on a sofa, both of which were disarranged. Witness saw a note, partially written, from Lady Collin, addressed to a meeting at Kimbura. The note began with the words, "My darling George. The same night Lady Collin let a gentleman into her room when she returned from Leigh Court. She asked witness what the fuss in the house was about, and whether Miss Baer had told Lord Collin anything. Witness replied that Miss Baer had told him that her ladyship had passed several nights with Marlborough while at Leigh Court. Lady Collin replied that it was a lie. The next evening Miss Baer went away. When witness told Lady Collin that Miss Baer had told him, she had not mentioned what he had himself seen. When Lord Collin was in Scotland, Lady Collin went, from the house on Saturday, August 19, 1881, and returned on the Monday following. The Duke of Marlborough and Chief Shaw called each twice a week during the whole period of witness's employment in the house. At this point witness testified to acts of indecency on the part of plaintiff with Chief Shaw. An adjournment was then taken.

Exposed by His Bookkeeper.

New York, Dec. 2.—Judge Donahue, of the Supreme Court, has granted a writ of attachment against the property of Antonio Rivera, of No. 50 Lispenard street, and deposes that he last night obtained a complaint of his former bookkeeper, Clifford Kemp. Kemp charges that Rivera ordered him, as bookkeeper, to change the accounts of the business so as to show the assets to amount to \$300,000, while in reality there was only \$6000 worth. Kemp alleges that Rivera, who is a native of Italy, obtained \$30,000 insurance by setting the place on fire. Kemp was to receive \$3000 for the job, and he claims that the insurance adjuster was paid \$5000 to give a favorable report.

Assaulted in a Courtroom.

NARA, Dec. 2.—Thomas Riley, stabbed Michael Kearney seriously about the neck and breast in Justice Lane's court yesterday at Yountville. Riley's wife and Kearney had a quarrel during the day about the business of the Kearney stock-broker, and Mrs. Riley had her assailant arrested for assault. During the court proceedings the men quarreled. Kearney will likely recover.

## The Times.

BY THE TIMES-MIRROR COMPANY.

H. G. OTIS, President and General Manager. ALBERT McFARLAND, Vice-President, Trade and Business Manager. W. A. SPALDING, Secretary.

CONTENTS.—The general arrangement of the contents of the LOS ANGELES TIMES, not including the extra sheet of the Sunday paper, is about as follows, subject to later modifications in particular cases.

TELEGRAPHIC NEWS—1st and 2d pages.

CITY AND NEIGHBORHOOD NEWS—3d, 4th and 5th pages.

EDITORIAL, GENERAL CORRESPONDENCE, ETC.—4th page.

LETTERS FROM THE PEOPLE, ETC.—4th page.

COMMERCIAL NEWS ("BUSINESS")—7th page.

Real Estate, Hotel Arrivals, Births, Marriages and Deaths also appear upon this page as a rule.

SPECIAL EDITION.

To-morrow's issue of THE TIMES will be a 12-page paper, with many special local and other features of interest.

An unusually large edition will be printed. Advertisers will make a note of this opportunity to reach thousands of new and old readers, seize time by the fetlock, and send in their orders early.

Special rates for display advertisements in this single issue will be made at the counter, or by the solicitors.

Advertisers desiring to hire extra space are specially enjoined to have their "copy" ready not later than this (Friday) afternoon, as the first form must go to press shortly after dark.

Dr. French and High License.

THE TIMES yesterday corrected an error into which it had inadvertently fallen in regard to the final vote cast in the Council by Dr. L. W. French (now the Republican nominee for Mayor) on the license ordinance.

The record which was published of the negative vote cast by him on that measure appears, upon closer investigation, to have been the record of his vote on the general license ordinance at that stage in its consideration when the liquor clause was under discussion, and which clause he then voted against.

His vote on final passage, as already stated, was in favor of the ordinance as a whole.

The editor of THE TIMES was at first honestly mistaken about the matter, and now again takes occasion to frankly correct his erroneous publication, and to set Dr. French right before the public so far as his final vote is concerned.

At the same time we, of course, maintain the justice of our criticism of the earlier and negative vote cast by Dr. French on this measure, so vital to the good morals and well-being of Los Angeles.

His Game.

The Tribune is naturally "smoothy."

It is owned by a smoothy, and run in a smoothy interest. It is Smoothy's private personal "organ." Smoothy started it for the avowed purpose of "downing THE TIMES."

Furious to find his efforts futile and his attempted vengeance costing him dear, he tries his most artful dodge. He and his crowd were not for French for Mayor. Dr. Cochran, an honest man, was not of their kind, but they supported him because they saw that he appeared to be the stronger candidate. They were to elect him and claim his gratitude.

But at the last a "better way" appeared to Mr. Boyce. He and all his followers voted for the secret ballot; and when that secret ballot had been taken, Dr. French had received 55 votes out of 80.

Nearly half of Dr. Cochran's 23 votes were from the Fifth Ward, where they are too alert for Boyce to have any particular hold. Who cast all those votes for French? THE TIMES will let its readers figure that out.

The amount of it is that the vicious motive of Mr. Boyce was above and beyond all other considerations, to try and make, or find a chance to accuse THE TIMES of "mugwumpism," so that he might hold his own cowardly and shuffling paper up as the only original

Jacobs of Republicanism. He cared nothing for the fitness of the nomination or the probability of election; these considerations were as nothing to this alleged Republican compared with a chance to make a supposed point against THE TIMES. And let those who doubt whether any one could be found so low as to do such a thing, let them consider what Mr. Boyce and his allies said of Dr. French privately before the nomination, side by side with what Boyce's paper says of him now.

## The Insane Asylum.

THE TIMES is just in receipt of an interesting report of the Superintendent of the Insane Asylum at Stockton for the two years ending June 30, 1886. It contains some valuable information.

It appears therefrom that upon the 30th of June of the present year the inmates of the asylum numbered 1486, an increase of 271 since June 30, 1884. The superintendent complains that although the accommodations have been greatly enlarged within the past two years the augmentation of patients still leaves the institution in a crowded condition. He estimates that the average number of inmates for the next two fiscal years will amount at least to 1500. While there is a demand for an annual appropriation of \$216,000, there is evidence of extreme economy, the per diem cost per capita having been reduced under the present management from 41 cents to 37 cents and 2 mills.

It has been the general impression that the unwelcome foreign immigration to our State, the speculative propensities of our people, the pervading thirst for rapid accumulation of wealth, the sudden collapse of fortunes, the vast consumption of ardent spirits, and the severance of family ties predisposed our people to mental disease in an abnormal degree. The superintendent happily dissipates this illusion. His predicate upon this point is that the aggregate number of the insane is ever on the increase in a growing community, and proportionately to such increase. Keeping in view such proportionate increase, his tables conclusively establish that the insane of the present year are less than three years ago; and three years ago less than six years ago.

The census of 1880 shows that one-seventh of the population of California were of foreign birth, and that one-third of our insane, and not one-seventh, as might have been expected, were foreigners. Whatever the causes, it is very apparent that our unusually large foreign population keep up a very high rate of insanity. Another startling matter is brought to our view in this report. There are at Stockton seventy Chinese patients, and at Napa about the same number. In this degraded class mental diseases are peculiarly rife. They subject the State to an annual expense of \$19,000. Less than half of that sum would return the whole number to Hong-Kong, from whence they emigrated. Other States—notably New York and Massachusetts—expatriate mentally defective immigrants. Why should not California follow in their wake?

The prevalent idea of the increase of insanity in California, notwithstanding its adverse foreign element in this regard, is completely exploded in this reliable report. It remains to show from the same source that it is favorably disproportionate to other States in the Union. In nearly every one of our eastern States poor and alms-house are the receptacles of chronic imbeciles. We content ourselves by the single reference to Iowa, where this distinction is drawn. The census of 1880 enumerates 2544 insane confined in lunatic asylums, and 2314 idiots distributed in poorhouses. But in our State they are huddled together and all are classed as insane. The superintendent clamors for a separate and distinct home for the idiot, and declares with much feeling that his association with lunatics is the reverse of humanitarianism—he claims that it does him grievous and irreparable wrong. He says truly that the idiot learns by imitation solely, and copies from his lunatic comrades.

To return to our statistics. The population of this State exceeds somewhat a million. In the two asylums 2622 inmates—1 to 360 inhabitants. The ratio in the State of New York is 1 to 365; in Massachusetts 1 to 350. While some few of the other States fall below, many of them exceed our proportion. And so it will be seen that the amount of insanity in this State is nowise above the normal. Californians are not more prone to insanity than their neighbors.

We observe a disposition on the part of Mr. Boyce in his paper to be brash and vicious towards THE TIMES on the subject of the mayoralty. Mr. Boyce, after proving himself a known, though secret, traitor to several of the Republican nominees in the late county contest, now seeks, by over-much zeal, to establish himself and his personal organ as consistent thick-and-thin party supporters, par excellence. This will not do, Mr. Boyce. When THE TIMES has material objections to a candidate, based not merely upon personal ill-will or prejudice, but upon grounds of public concern, it states those objections manfully and openly and takes the consequences. It never resorts to the "smoothy" practice of secret stabbing and private vengeance. Double-dealing, hypocrisy, lying, pretense and fraud are bad qualities, which a discriminating public instantly detect in pretenders and shams like yourself. Do you see, Mr. Boyce?

THE Evening Express, to its shame be it said, is not more decent or truthful, and not a whit less vicious towards THE TIMES than that bastard and lying sheet, Mr. Boyce's Tribune. Both of them lie like a tombstone; they lie when there is no provocation for lying; they lie when the truth would serve them better; they lie, or appear to lie, for the very love of lying; they revel in falsehood and delight in forgery. Both rotten in their boasted party character, they seek to make the public believe in their party fealty by much loud and brazen shouting about "mugwumpism" in others. We understand that racket; "we know all about the board."

When a known thief, a proved scoundrel, and a notorious pretender makes an assault upon the character, the motives or the truthfulness of an honest man, he does a reckless thing—a thing he cannot afford to do—and puts himself in jeopardy, for the recoil, when it comes, is terrible. Any "smart politician" or snide "generalist" whom this particular remark of THE TIMES properly applies will please take notice and govern himself accordingly.

THE Democratic City Convention Tuesday night made a voluminous howl because the Republican Council has not already paved all the streets. It is a poor "recommend" to the party which desires to assume control of the city government, that it is ignorant of the fact that under our present faulty State laws Council cannot compel property-owners to pave.

THE Arbustus Hunter. Now the pink arbutus spray Lures the maid, At its lovely petals peep, Kissing from their winter's sleep, Welcoming the vernal day Bright arrayed.

Bids she then her lover lie To the field, Where the tower lifts its head From its lonely forest bed, And her lover with a sigh, Murmurs "Gehenna."

Yet he tramps the woodland through Searching each oak spreading tree; But not a blossom can he see, And he sighs "It never grew Anywhere."

Home at even he takes his way With a curse, And he sees not his home, When some other love, and so When he comes, they find He does not converse. —(Boston Post.)

## MEN AND WOMEN.

A New York dude gave up his seat in a street car to a lady for a dollar.

The longest Pullman line in operation is from St. Paul to Portland, Or., a distance of 1913 miles.

It is reported on the authority of Edmund Yates that the Empress of Germany will pay a visit to Queen Victoria in the spring. The Minneapolis Press Club gave a reception to the ministers of that city on a recent night. Did the boys initiate their guests into the mysteries of scope and all-night work?

While Mrs. Rebecca Phillips, of Blairsville, Ga., was milking she fell back with a violent pain in her head and died in great agony. The cause of her death was not ascertained, but she was apparently perfectly healthy, was similarly stricken, and died at the same time.

Gov.-elect Bob Taylor, of Tennessee, is a direct descendant of the twenty Democratic State Senators who are candidates for the speakership, and all are enthusiastic supporters of Gov. Bob for United States Senator. On Saturday, when Sam Jones asked an Omaha congregation if there was a man present who had never spoken an unkind word to his wife. One man stood up, and when Mr. Jones thanked him for a perfect gentleman, he said, "The candidate spoiled it all by announcing himself a bachelor."

Mr. Lynch's Fraud Cry.

Editor Union: The card of Joseph D. Lynch, the late defeated candidate for Congress in this district, not only demonstrates his position, but is an insult to the people whose suffrages he sought. In this card he gives himself completely away. It is a pretty plain declaration of his faith in the race of the Democratic majority in Congress that he believes that he will give his seat to which he was not elected because he is a Democrat. In taking this view Mr. Lynch is declaring that he is a fraud.

Following is a sample of many kind and flattering letters received by THE TIMES: I am very much pleased with the great improvement in THE TIMES, and the straightforward management. You have got out a newspaper that any city in the East would feel proud of. The new type is bold, clear and pleasant to the eye, and the make-up and classification of news and advertisements are excellent, but above all these you deserve the highest credit for the way you have put your book in the late election and in the present one. It must have cost you many weak-kneed subscribers and advertisements, but you have got out a newspaper that any city in the East would feel proud of. ## SCIENTIFIC MISCELLANY.

**Astronomy as an Investment.**—Prof. E. C. Pickering, of the Harvard College Observatory, remarks that the many millions of dollars spent upon astronomy during the last two or three centuries have yielded returns whose value cannot be estimated. Aside from the knowledge gained of other worlds and of the laws governing the universe, the information obtained concerning the time has been of enormous practical importance. Safe and certain communication between distant countries has been secured, together with accurate maps and the precise determination of time. These results have a pecuniary value which would repay many times the total of all astronomical expenditures.

**Fixing the Date of Death.**—By a study of the organisms which work upon corpses, M. Meguin claims to be able to determine the date of death, a matter which is often of great importance. In a body which had lain in a cellar for a year, five different species of acarina were traced, with the order of succession and duration of each. One species consumes the fatty acids, the precise determination of time. These results have a pecuniary value which would repay many times the total of all astronomical expenditures.

Experiments communicated to the French Academy by M. Vulpian show that in fishes the intellectual and instinctive faculties, which in all higher animals seem to be located in the cerebrum, may be fully retained, with good health, after the complete removal of that portion of the brain.

Vast arid and almost rainless tracts in Australia, according to Mr. Joseph Bosisto, of Victoria, are thickly covered with a dwarf eucalyptus, barely eight feet high. The stem of this shrub contains half a pint of water, which bushmen quickly obtain, yet inexperienced travelers in these regions often die of thirst.

The Paris Geographical Society is collecting portraits of distinguished geographers and explorers, and has now over 1800.

**Drawing Carbon Filaments.**—The little threads of carbon whose heating furnishes the light of incandescent electric lamps, are made in a Glasgow establishment by a process somewhat analogous to wire-drawing. The kitoil (*Corypha urens*) fiber imported from Ceylon for brush-making, is first drawn to a uniform size through sharp dies. The threads are then placed in fine copper tubes, and the whole passed through a draw-plate, which has the effect of squeezing the metal round the fiber and compressing the latter. The tubes and filaments are next cut into lengths, then the filaments are carbonized in a crucible. The copper is subsequently dissolved off by means of acid, portions being left to form connections.

**A Vegetable Serpent.**—The cobra-plants of the Himaayas, belonging to family *Ardisia*, so strikingly resemble a cobra with its head erect, that persons coming upon it unawares instinctively recoil with horror. The half-moon-shaped markings on the cobra's head and the lines on its neck are imitated in the flower sheath of the plant, while the tongue-like elongation of the pistil and of the midrib of the flower sheath serve to increase the resemblance of the plant to a living animal.

**Japanese Volcanoes.**—Japan is considered by Mr. Milne to have at least 100 undoubted volcanoes, of which about 45 are still active, or have been so during the historical period. About 282 eruptions have been recorded. The intensity of volcanic action seems to have been as great as in any part of the world. A period of unusual activity was between 1790 and 1860, during which time part of Mount Unzen was blown up with a loss of from 27,000 to 53,000 lives, many islands were formed in the Satsuma sea, Sakurajima threw out so much pumice that it was possible to walk a distance of 23 miles upon the floating debris in the sea, and Asama ejected many blocks of stone—one of them 42 feet in diameter—and a lava stream 40 miles in length. The eruptions have exerted a powerful influence on the minds of the people, causing divine interference to be especially sought, while mountain deity worship continues not uncommon.

**A Novel Engine.**—An ingenious pumping engine has been submitted to the French Academy of Sciences by M. Teller, and is thus described: The roof of a shed or small building is made of tight compartments formed of iron plates, which are riveted at their edges. In each of the compartments a volatile liquid is inclosed, which becomes vaporized by the atmospheric heat, the vapors escaping by tubes which meet in a common reservoir. Whatever liquid is drawn with the gas returns to the compartments by a lower tube. The vapors pass from the reservoir to a metallic sphere at the bottom of the well, where it is condensed by the water's cold. This sphere has a caustic soda diaphragm which can be lifted by its elasticity alternately to the upper or lower hemisphere, so as to move a sliding valve, and by the alternate introduction and condensation of the vapor to raise water in considerable quantities. In actual working, a machine of this kind raised 250 gallons of water per hour from a depth of 23 feet.

**The Horse Age.**—One of the most interesting stations of prehistoric man in France is found at Solutre, and, while containing numerous human remains with stone implements, etc., is chiefly remarkable for the enormous deposit of horse bones accumulated about the stone hearths. A wall five feet high, eleven to fourteen yards long and four and a half feet wide is composed entirely of these equine remains. Dr. Cartailhac estimates that 40,000 skeletons might be reconstructed from the bones, and he assumes that the horse must have reached its greatest development and served in place of all other game at the time when the ancient hunters left the accumulations at this place.

From observations in various widely-separated cities, a German meteorologist finds that the yearly mean temperature in a town is from one to two degrees higher than in the surrounding country, the difference seeming to depend less on the size of the town than on the surroundings of the observing station. Both the daily and the absolute fluctuations are smaller in towns than in the open country.

## THE PACIFIC COAST.

## PLENTY OF RAIN IN PROSPECT ON THE COAST.

**Wells, Fargo & Co. Employees Must Furnish Bonds—California Dried Fruits in Demand at the East—Other Notes.**

**By Telegraph to The Times.**  
SAY FRANCISCO, Dec. 2.—A Signal Service special bulletin says: "The month of November just passed is noticeable over all others of which a record has been kept for the low temperature, accompanied with absence of rain, permanency of areas of high barometer, and its severe northern. The abnormally low temperature appears to be in such a condition as warrants a good prospect for considerable rain during the coming season, especially for December and January."

**A Bond Required.**  
SAN FRANCISCO, Dec. 2.—Since the recent default of Charles W. Banks, cashier of Wells, Fargo & Co.'s Express Company, by which the company lost over \$20,000, an order has been made by the directors requiring all officials of the company who have the handling of any money to file a good and sufficient bond. Sureties for nearly all the officials have already qualified.

**California Dried Fruits.**  
SAN FRANCISCO, Dec. 2.—The Call's Chicago special says that the dried fruit market for California varieties is steady and firm, former prices being obtainable for all descriptions, which are meeting a fair sale. Quotations are as follows: Prunes, French, per pound, 9 cents; plums, platted, per pound, 13 cents; peaches, quarters, per pound, 12 cents; peaches, halves (pared), per pound, 25 cents; nectarines, per pound, 9 cents; pears per pound, 8 to 15 cents.

**An Invalid Ordinance.**  
HOLLISTER, Dec. 2.—The trial of J. J. Fay, of the McManis House, resulted today in the jury rendering a verdict of not guilty. This is the first case of violation of the high-license ordinance passed last May. All the saloon-keepers of the town have refused to pay the license, and are now under arrest for violating the same. The validity of the ordinance was put in question by the defense, and doubtless the case was decided on that point. The case was bitterly contested, and the result caused considerable excitement in prohibition circles.

**A Dear Transaction.**  
FRENCH (Cal.), Dec. 2.—S. F. Winchell, constable in this city, was attacked by a pet dog, last night, while passing through the courthouse grounds. A struggle ensued, and Winchell drew a revolver to shoot the dog, but the animal struck the pistol and caused it to discharge its contents into the eye of Winchell's wrist, shattering the bone.

**Struck a snag.**  
NICOLAUS (Cal.), Dec. 2.—The steamer D. E. Knight, while on her down trip yesterday, struck a snag about two miles above the mouth of Feather River, knocking a hole in her bow. Water-tight bulkheads and canvas saved her from sinking.

**A Stock-broker Falls.**  
SAN FRANCISCO, Dec. 2.—The failure of Capt. Wm. L. Duncan, member of the San Francisco Stock Exchange, was reported late this afternoon, as a result of the failure of Greenbaum & Straus. The extent of his liabilities is not known.

**A \$20,000 Haul.**  
SAN FRANCISCO, Dec. 2.—The customs officers to-day seized \$20,000 worth of opium on the steamer City of Rio de Janeiro, recently arrived from China. The drug was found in the coal bunkers.

## STOCKS AND BONDS.

**By Telegraph to The Times.**

**New York, Dec. 2.—Government bonds** were dull and firm. The stock market, while still very active, showed a small decline in the amount of business done; and, while leading quotations were steady, speculation in Union Pacific made further progress and Union Pacific suddenly sprang to great activity. The other features of the market were Northern Pacific, quicksilver, and exhibit the strength of the past few days, and heavy selling by a very influential interest is reported. The opening was strong, first though Omaha was up 1/4. Prices were weak in early trading. Union Pacific showed some strength, and then generally declined. Some improvement over those of the opening. The market became more quiet in the afternoon, and under realization sales, and the market yielded. There was a slight rally in the last hour, but the market closed generally weak, close to the lowest figures of the day. Money on call: Active; 5/8 per cent. Sterling exchange: Unchanged.

**New York, Dec. 2.—Petroleum:** Firm; United closed at 84 1/2.

## A 1601 COMMITTEE HAS BEEN ORGANIZED AT BAKERSFIELD, AND WILL CLEAR THAT TOWN OF TRAMPS AND VAGRANTS.

It is proposed now to construct a bridge across Carquinez straits, to take the place of the ferry-boat Solano.

The work of picking the second crop of grapes will begin in Bennett valley, Napa county, the coming week.

The Yacavilla Justinian says that the orange harvest is in full blast, and shipments are being made daily.

It is authoritatively stated that the Northern Pacific Railroad intends to spend a million dollars in improvements about Tacoma the coming season.

The school children at San Jacinto play snowball with the round, yellow fruit of the orange "toyote" or mock orange, which is so plentiful on the southern plains.

**Low Wallace's Reminiscences.**  
Gen. Lew Wallace, whose Ben Hur has had a wider circulation and a greater success than any other religious book produced in this generation, has given to a contributor to the Detroit Journal some interesting reminiscences. He had completed, he says, the first part of Ben Hur, which carries the story down to the birth of Christ, when he chanced to meet Colonel Ingalls. At that time the General did not trouble himself to inquire into the truth of religious doctrines, but Ingalls' talk determined him to investigate and decide for himself as to the divinity of Christ. For five years he studied the life of Christ and the history and customs of Judea and the Jews. He had gone but a few steps when he came to the conclusion that Christ was divine. When Ben Hur was completed he went to the Holy Land and spent months in visiting every place referred to, in order to verify his work. Not one word required to be changed.

## A GOOD MOVE.

## Preparing Already for Next Spring's Flower Festival.

The ladies who have won such fame under the title of the Flower Festival Society are always progressive. They are already looking about to make arrangements for the next festival. In April they propose to hold a flower festival which will double discount even the superb affair of last spring. They will have the elegant new pavilion to do it in next time, by the way. Next Tuesday morning, at 11 o'clock, they will meet the excursion managers at Judge R. M. Widney's office, to make mutually profitable arrangements. It is proposed to advertise the festival extensively throughout the East, and to have the excursions run to fit. Hundreds of Eastern people will doubtless so arrange that their party here shall fall upon the time of the Flower Festival—and they will be richly rewarded if they do.

## Maybe They Can't Afford to.

We suggest that the directors of the Los Angeles Tribune buy their proof-reading galley, so that they no longer let it go "narrow-gauge." It is getting tiresome.

## Steamer Passengers.

The Santa Rosa sailed yesterday with a large number of passengers. The following is the list:  
For San Francisco: Mrs. G. M. Dixon, Mrs. B. Rochester, Mrs. J. W. Mearns, Mrs. J. N. Hamer, Mrs. G. W. Kimball, A. T. Stewart, R. D. Stern, wife and daughter, Mary Holmwood, Adam Sherman, R. Smith, John Whitford, G. H. Schuch, Mrs. D. W. Dwyer, Mrs. A. M. Wood, Lee McGowan, O. A. Tule.  
For Port Harford: Miss Ella McNeill, Miss Kate Pettigrew, Miss Harriet Bushnell, J. B. Nichols, J. P. Bushnell, Mrs. M. J. Bushnell, Mrs. E. Bushnell, H. C. Fry, J. J. Beck.  
For Santa Barbara: C. C. Haley, George F. Barber, Mrs. J. T. Harris, Mrs. F. Hawkins and three children, C. Mackay, Mrs. N. Miller with two children, Fred G. Miller, Mrs. S. Eustephore, Nellie Stanley, T. B. Bishop, and wife, Mrs. H. Hawkins, E. E. Mearns, H. J. Hines, John C. Hines, Miss Ada Hines, Mrs. W. Miller, E. F. Hines, wife and child, Miss M. Hines, Miss S. F. Hines, wife and child, Miss M. Hines, wife and child, Father Adam, Rev. Father Haines, R. G. Smith, G. Goodfriend, W. T. Williams and wife, J. S. Pico, W. N. Hawley, Mrs. Y. Hawley, Mrs. J. Hawley, Mrs. Ramona Shaw, Mrs. Anita de Moreno, Mrs. Clara John, Thomas Bateman, wife and children.

## A Popular Tract.

Why lots on Victor Heights are selling faster than those in any other tract. Because they are nearer the center of the city, liberal in size, with broad streets, and within 30 days will have the best of water, piped to every lot, free of expense to the purchaser. The view is unsurpassed, easy terms, and prices so low that speculators have made from \$100 to \$400 by selling single lots, within the last few days. We invite inspection of the company's book and maps at their headquarters, in the office of Moore, Snyder & Narancho, 109 W. First street, Napa street, where free conveyances are passing to and from this tract, all hours of the day.

## Stone Fillers.

All who have tried them, pronounce the Oats City Stone Fillers the cheapest and best for filling. It is easily cleaned every day, and lasts for years. Found at Parmelee's. His window is full of them.

## Santa Ana Valley.

In booming, and investment should be made while property is reasonable. For reliable information call at the office of C. Z. Culver, immigration agent, 24 N. Spring street.

60—LOTS—60

IN THE ELA PARK TRACT.

Situated on Gates, Hansen, Hancock, Patrick and George sts., East Los Angeles.

WEDNESDAY, DECEMBER 3RD, 1886, at 10 o'clock precisely, on the grounds.

This attractive property is the most desirable in East Los Angeles, being only a block north of Downey ave., within easy access of the street cars, and the natural slope of the land makes drainage perfect.

PURE MOUNTAIN WATER IS LAID TO THE TRACT.

HIGH ELEVATION.

NO FOGS. NO FROSTS.

NO MALARIA. NO ASTHMA.

The largest lots ever put on the market. Magnificent view of the city and ocean, afford a commanding view of surrounding beauty. Many of the lots have orange trees and vines on them. All will greatly enhance in value when.

THE DUMA VISTA BRIDGE IS COMPLETED.

Which will shortly be an accomplished fact, and so remove entirely the present inconvenience of railroad and river. No such property is offered for sale upon such easy terms, with so great a certainty of a rapid rise.

TITLE PERFECT. A certificate furnished with each lot and an abstract for inspection.

TERMS OF SALE: Ten per cent. on the fall of the hammer; 25 per cent. within 30 days; balance in 15 and 15 months, at 4 per cent. interest; giving all a chance to buy and make a turn with a handsome profit.

No cash down, no tally-ho coach, but STRICTLY BUSINESS.

Parties wishing to view the place will please call at our office, where a carriage will be at their service. Also both lines of the East Los Angeles street cars pass within a block of the tract.

For map and catalogue apply to C. A. SUMNER & CO., Auctioneers, 14 N. Spring st.
